ARTBOX: COLLECT AND SHARE

SHARE COLLECTIONS AND CATALOGUES OF WORKS TRANSPARENTLY.

ArtBox offers collectors, gallery owners and artists a new, innovative way to present and document art online. Unlike on standard websites or in conventional digital archives, where access is either completely public or restricted, ArtBox allows art to be made visible in a very flexible way.

WHO CAN VIEW THE ARTWORK AND FOR HOW LONG?

As a collector and administrator, you can decide with just a few clicks who, as a visitor, will have access, i.e. insight and further information about the works in your collection. This makes exchanges with other collectors, cooperation partners and potential buyers manageable and, above all, more secure. Of course, access can also be limited for a specific period of time.

SMART SOFTWARE FOR COLLECTORS!

YOUR ARTWORKS IN ALL THEIR DIGITAL BEAUTY.

The images of the works in your collection are displayed in the ArtBox front end at maximum resolution on all web browsers. Whether on large 5K studio displays, tablets or smartphones, your communication with art lovers and professionals is taken to a whole new level.

With ArtBox, you can keep track of your collection and find new inspiration for further development.

THE ARTBOX MISSION: YOUR ART COLLECTION ONLINE.

The initial impetus for developing ArtBox came after discussions with collectors, artists and gallery owners about dealing with contemporary fine arts in today's digital world. There was a lack of an easy-to-use and secure mobile-first solution for the individual presentation of collections. We created this solution in 2024 with ArtBox.

ArtBox is an international European solution. The system language is English. In addition to ease of use for collectors, a special focus is placed on data security. Hosting is provided on servers in highly secure data centres in Germany (EU DSGVO compliant).

WHAT DO YOU WANT TO SHOW AND TO WHOM?

STORE IMAGES, VIDEOS, TEXTS AND DOCUMENTS IN A STRUCTURED AND FUTURE-PROOF MANNER.

In addition to custom programme code, ArtBox uses the TYPO3 system, a framework for complex and scalable web applications that has been tried and tested hundreds of thousands of times and is continuously being improved. This means you also benefit from the knowledge and experience of a large web community with a guaranteed future. TYPO3 enables intelligent control of access permissions for editors (collectors) and visitors: access and viewing rights can be set individually and for groups, and limited in time if necessary. They can also be revoked at any time. This makes exchanges with potential collectors, curators and buyers controllable and, above all, more secure.

Of course, you can also decide to make your entire ArtBox visible. In this case, ArtBox offers a landing page module as your very own personal showcase to the world of art. Even then, you can still hide selected artists and works from the backend at any time if you want them to remain confidential.

ART MASTER DATA: OPTIMAL DOCUMENTATION IN THE BACKGROUND.

The ArtBox editorial access allows you to quickly enter all important information about the work, the artist and the provenance. Images, videos, texts and related documents that are relevant to you are stored in a structured manner.

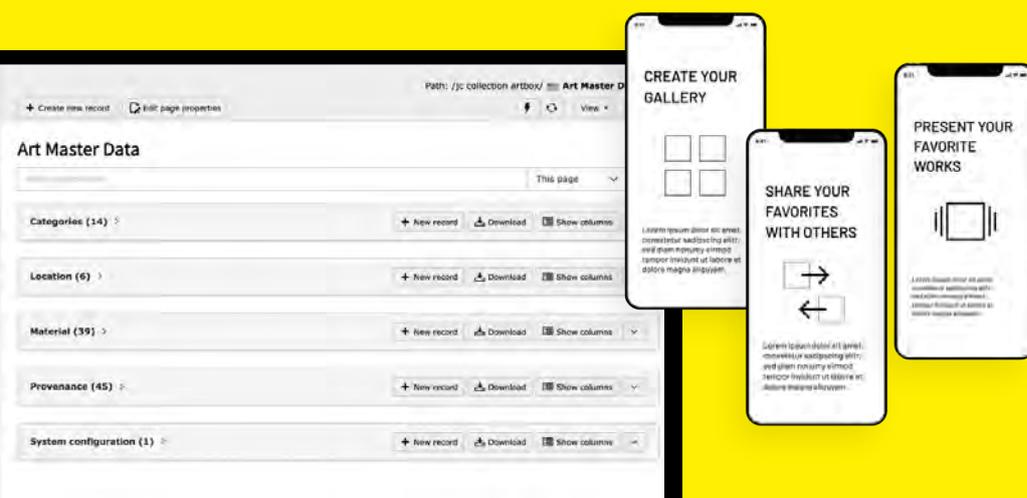

The ArtBox uses future-proof database standards that allow you to export the data in XML format or output it as a PDF exposé.

SUPPORT WITH ENTERING CONTENT.

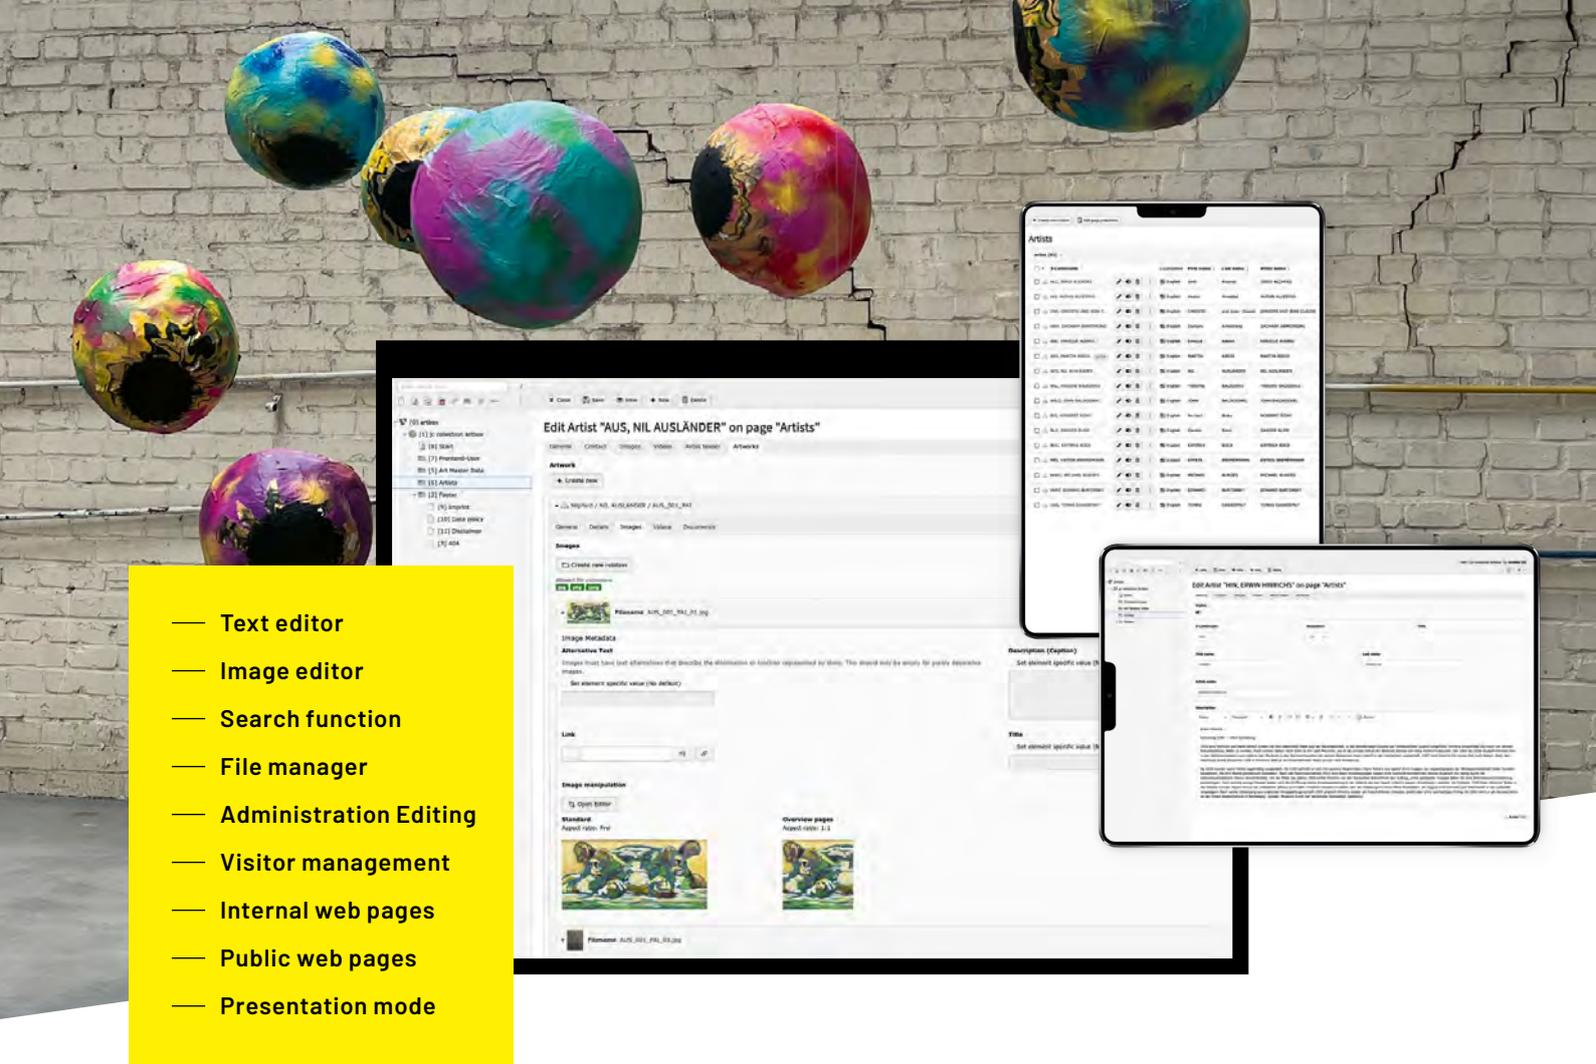

Of course, storing your artworks requires your valuable time. ArtBox actively supports you in this process.

All essential attributes for documenting an artwork are already stored. With just a few clicks, a work can be comprehensively documented and supplemented with individual images, texts and videos.

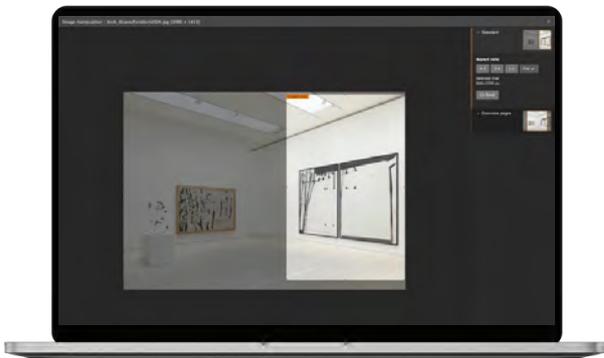

You can expand, change or deactivate the categories already stored at any time on a master level.

PICTURES SAY MORE THAN WORDS.

WHY THE ARTBOX IMAGE MANAGEMENT CAN SAVE YOU A LOT OF TIME:

The desired images of artworks, artist portraits or exhibition spaces can be easily uploaded to ArtBox using drag & drop. They are then available for further editing and linking to other content.

The image editor is particularly convenient: with just a few clicks, you can edit the optimal image sections and aspect ratios and specify special details for web display.

The recommended resolution for stored images is max. 2,000 x 2,000 pixels (image format jpg). This means that photos taken with smartphone cameras already have the necessary resolution for brilliant display in current web browsers.

THE ARTBOX STARTER PACKAGE. SERVICE INCLUDED.

YOUR ARTBOX IN THE FIRST YEAR:

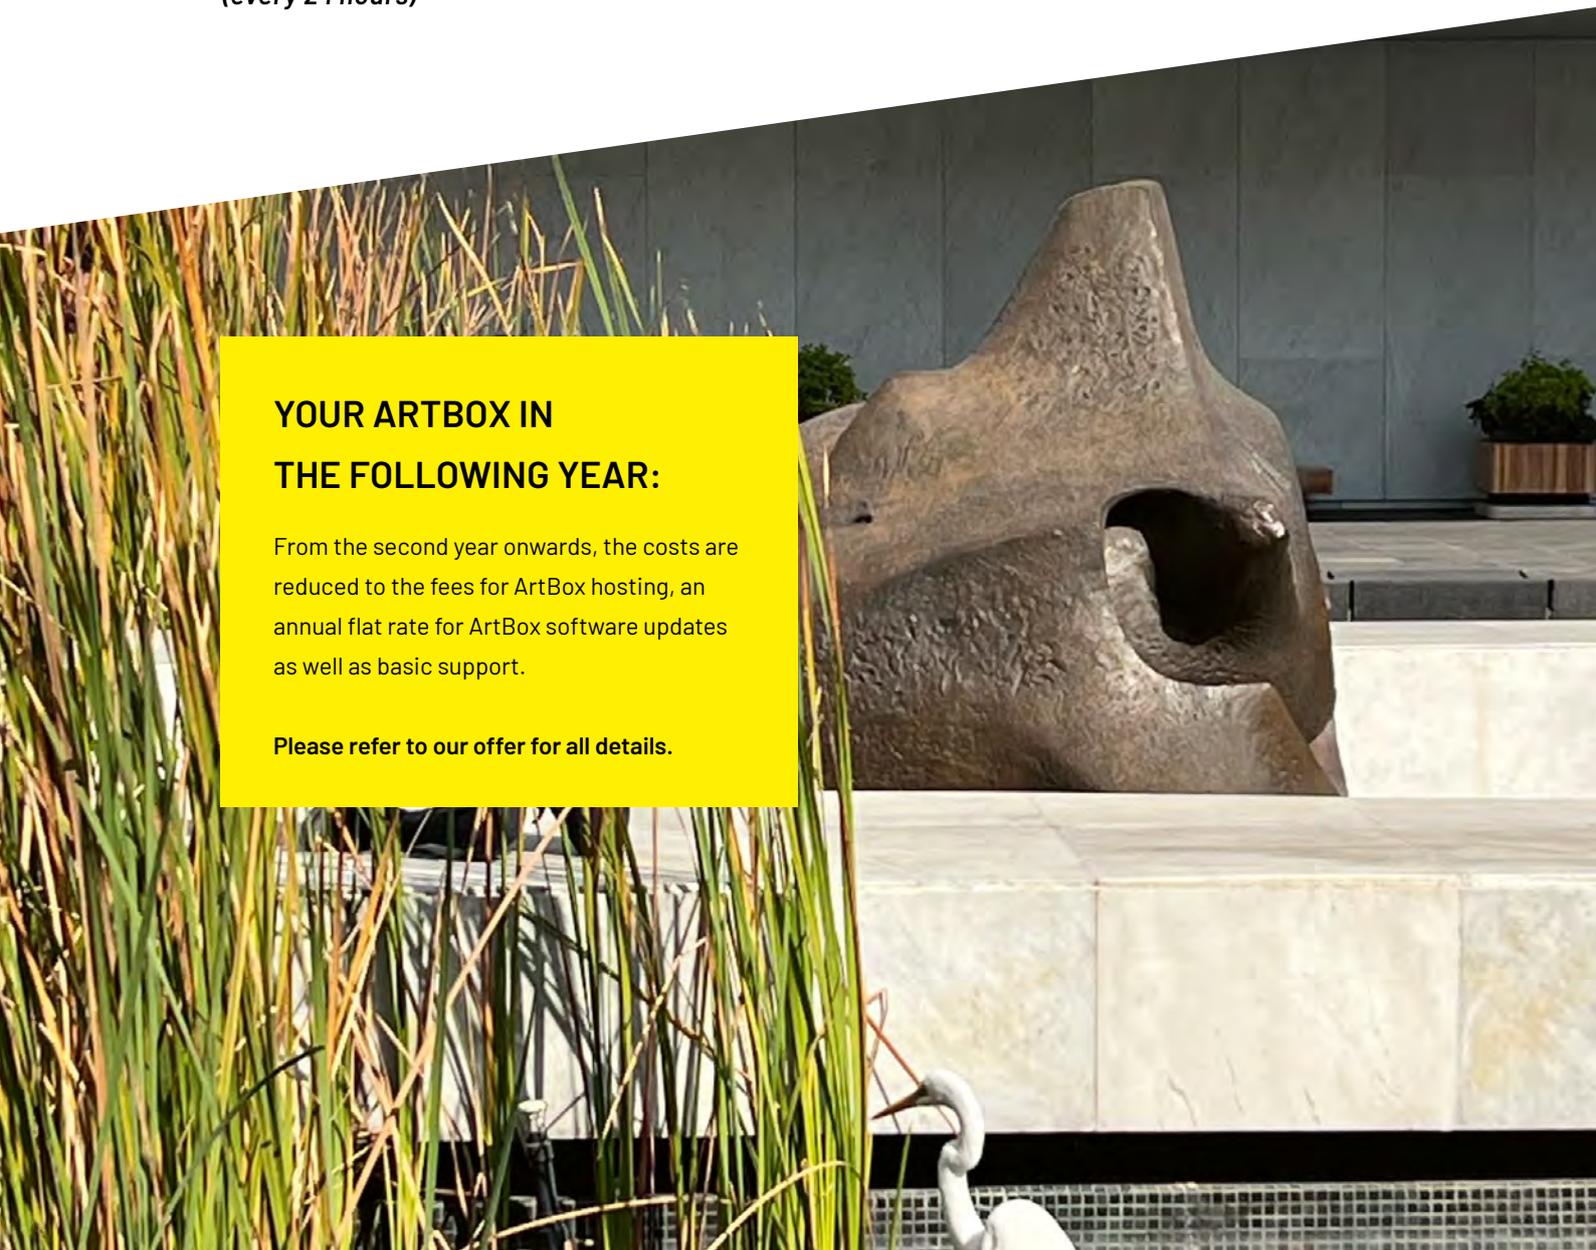

You will receive your ArtBox starter package with software and services in the first year for a one-time payment. It includes the following services:

Setup of ArtBox functionality as a software service solution (no separate hosting required) // Registration of your desired domain (second level) or an individual main domain (based on time and effort) // Provision of initial login details for your administrator, including training (max. 2 hours) // Participation in the update programme, including use of all additional functionalities // Training appointments by arrangement on site or as a video call (max. 6 hours) for your team // User manual as a document and online help with support tickets and service hotline Monday to Thursday from 9 a.m. to 3 p.m. (CET, Berlin) // Daily data backup (every 24 hours)

YOUR ARTBOX IN THE FOLLOWING YEAR:

From the second year onwards, the costs are reduced to the fees for ArtBox hosting, an annual flat rate for ArtBox software updates as well as basic support.

Please refer to our offer for all details.

THE COLLECTOR SOFTWARE FOR COLLECTIONS.

OUR JOINT PLANNING:

Since 2025, ArtBox has been available to an exclusive circle of clients. All experience gained from using ArtBox 1.0 will be incorporated into ArtBox 2.0, which will be launched in 2026.

For further information, please visit artbox@berlinbrands.de and info@artbox.live, or call us on +49 30 8100 59 99 between 10 a.m. and 6 p.m.

ArtBox is a project developed by Berlinbrands CC GmbH with BRAINS / DATAFIX as its technical implementation partner.

We would be delighted to hear from you and welcome your opinions, suggestions, requests for enhancements and forward-looking ideas. Simply send an email to artbox@berlinbrands.de or info@artbox.live.

Your ArtBox team in Berlin!

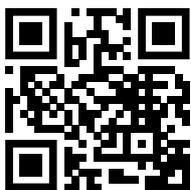

We would like to thank JC collection Berlin for kindly providing the images from the collection.
